

1. Download templates from <http://www.marthabianco.com/Courses/FK/Portfolios/Templates/>. Just open the website and click on Save As... and save each file you would like, with a USEFUL filename, onto your desktop. You need to make sure your filenames don't have spaces and that you will keep them consistent throughout.
2. Open Nvu and then open the template files. (If you haven't downloaded Nvu, do so, from www.nvu.com). Modify the template to fit your needs (see example below).
3. Publish to your odin directory using the File/Publish As... utility, as shown. Be sure you type the correct information in the Publish and the Settings tabs.
